44% Talk to **Children** living abroad (NRI / Expats) or in other cities à **Trust** advice

AUDIENCE RESEARCH

Mr. Walia

Mrs. Lolita

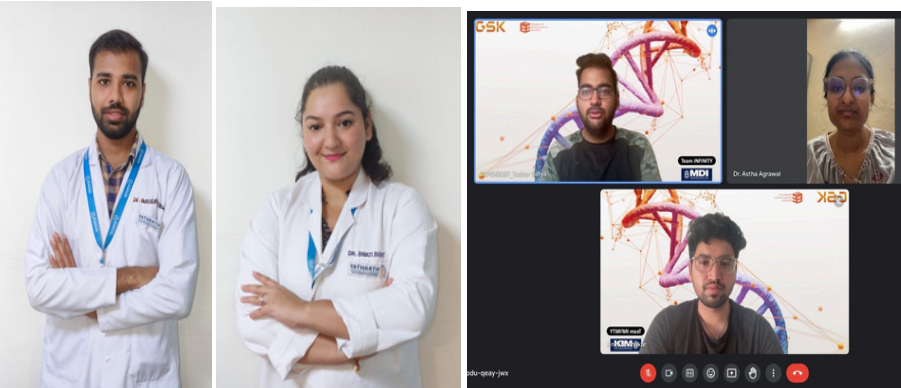

Mr. Shetty

PRIMARY RESEARCH

Research Background : 1 on 1 Interviews with TG, Healthcare Experts & Online surveys (**43 HNIs**)

Research Background : Online Interviews with Hospital Doctors that have catered to HNIs

- Yatharth Superspeciality Hospital, Noida
- Dr. Astha Agarwal, JNMC Aligarh

KEY FINDINGS

97%

Had NOT taken
Adult vaccines (Excluding COVID)

80%

Are NOT Aware
about Shingles disease

72%

Were NOT Aware
About shingles before contacting it

97%

Hesitant to Shingles Vaccine
Among those who are aware
Aware in regional terminology

34%

Of those who are Not aware
Hesitant due to Side Effects

51%

They impact on their **quality of life**

WHAT KEY BEHAVIORS OUR TG EXHIBIT

- 01 Spouses** may opt for vaccination together & influence each other decisions
- 02** Seek **Quantitative proofs** for health decisions: Have **"Need to Know"** checklist
- 03 Technology profiles** seldom influence decision-makers, unless they are associated with major differences in clinical outcomes

CONSUMER JOURNEY

1

Awareness & Information Access
They become **aware** of Shingles and its potential impact on their **quality of life** by themselves or doctors

2

Information Assessment
They **Evaluate** the **threat of disease** and potential solution (vaccine) themselves using internet

3

Access Healthcare System
àAfter they have gathered **enough information** they seek expert **advice & personalized** recommendations here
àThey prefer Personal Doctors because of their medical history

4

Evaluation
They Evaluate the vaccine's **efficacy**, potential **side effects**, & **suitability** for their health profile

5

Decision of Vaccination
Financial decisions are favourably made during **bonus** (corporate) or **post-festival** (business) time

CHALLENGES & AWARENESS PLAN

OBJECTIVE To Drive consumer **awareness** among High Net-worth Individuals & **Position** Shimtrax as “Healthy Ageing” Solution and lead **conversion**

CURRENT CHALLENGES FOR GSK

Challenge 1: Vaccination Mindset

81% of the Target Audience has a negative attitude towards Optional Vaccination

Challenge 2: Shingles Awareness

80% of The Target Audience is NOT aware about shingles disease

Challenge 3: Perception Variance

Regional Names, misconceptions and lack of proper Knowledge varies across TG market

Challenge 4: Risk Perception

80% of Aware TG does not believe they are at risk of shingles unless heard from Doctors

Challenge 5: High Price Justification

The high price of Shimtrax closest to what the TG usually pays needs to be justified

ADDRESSING CHALLENGES

Vaccination Mindset

For the 81%, Showcase positive vaccination experiences of Peer community members to encourage hesitant individuals to follow suit

Shingles Awareness

Implement BTL Marketing Techniques with Personalized Outreach, Health Concierge Services and leverage **Peer to Peer networks**

Perception Variance

Educate the Target Market in Local Language messaging and **colloquial** terms

Risk Perception

Personalize the risk by sharing real-life stories & statistics relevant to their demographics or location to make the risk relatable

High Price Justification

Communicate Cost vs Benefits (Quality, safety & efficacy) along with **Insurance coverage** to build trust on High price Justification

BARRIERS TO VACCINATION

Barrier	Index	
	Low	High
Fear of side effects		51%
Distrust in efficacy		23%
Doctor's did not exclusively Recommend		46%
High Cost		24%
Lack of national immunization schedule		32%

OUR COMMUNICATION STRATEGY

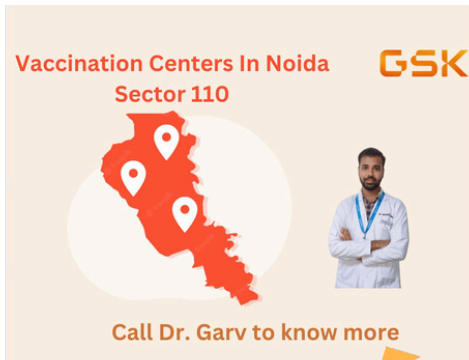

A/B TESTING

01

Awareness About Shingles
using Fear and call to action
Appeal. Currently deployed
“Mr. Bachchan talks about
Shingles”.

02

Drive the Need and Positioning :
Healthy Ageing campaign
“Shingles से \$र और 'ज़)दगी क. तरफ
गव 2से बढ़ो ”

Communicate that Shingles Vaccination is a part of healthy lifestyle, with “Motivation” Appeal. “**Slice of life**” from Mr. Bachchan and Peer Testimonial of Shingles Vaccination and how proud they are of this step .

04

Personalised Targeting
Using AI generate the
Localised Ad campaigns to
communicate nearby
Locations for Vaccination
Availability and in Local
Names

03

Educating on Shingles & Preventive Steps :
Communicate and address
the concerns that:
•People with Low immunity
are at Risk
•Shingles Vaccination is
safe for cancer patients
and other health conditions

Methodology: Two different variations of positioning
statement were tested among TG

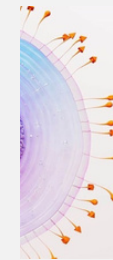

Location: Taj Hotels, Bangalore

Shingles से दूर और ज़िन्दगी
की तरफ गव से बढ़ो

Away from Shingles and
Towards a proud healthy life

Exhibit A

Shingles को पहचानो, हराओ,
और साथ में जीतें

Let's Identify & Defeat
Shingles and Win Together

Exhibit B

Respondent Age (50+)

77% Respondents (above 85Lakhs Net worth)

“Shingles is a severe disease, occurrence of it has increased from last 1-2 years. I got to know in June that the vaccine for it is launched but the acceptability is low, GSK needs to work on penetration” – Dr. Gaurav

“It is great that shingles vaccines is launched in India, but a lot of work is to be done. It will not be easy to increase it’s acceptability in India. Although I think, doctors can play a huge role in increasing it” – Dr. Astha

“No one from our family has ever heard about shingles or its vaccine. This means it’s rare and not too dangerous. We have Health insurance and necessary vaccines are part of the package” - HNI

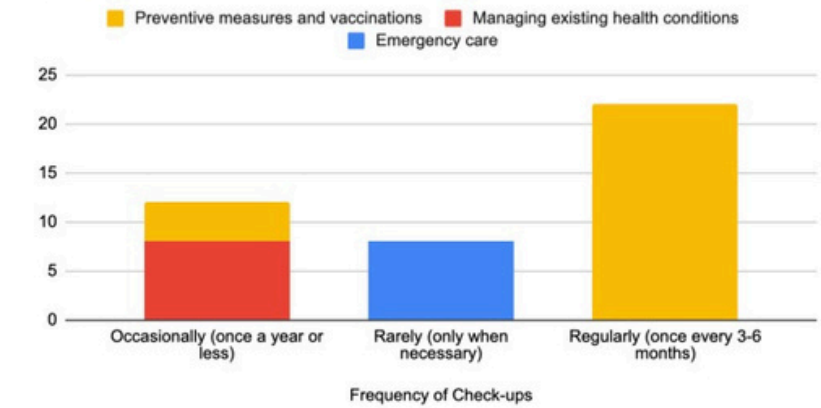

“We get regular check-ups from a fixed lab. We have also started using Tata 1mg for ordering medicines & kits. About the vaccine, we dont know the side effects, so won’t go for it at this stage” - HNI

50 to 85 Lakhs, Above 85 Lakhs, Below 50 Lakhs and Grand Total

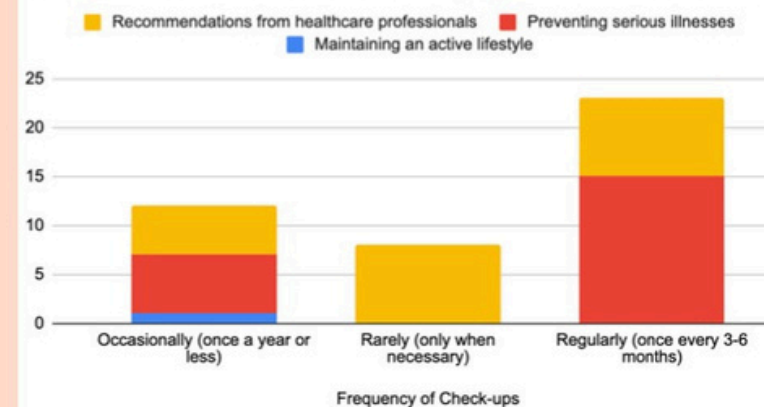

HNI's consider Regular Health Checkups
